NOMEX[®] Dosemeter

- ▶ CE marked, class IIb certified diagnostic dosimetry system, fully compliant with IEC 61674 for acceptance testing and quality control measurements on RAD, FLU, DENT, CT and MAM X-ray units (different sets available e.g. for RAD/FLU, DENT, CT, MAM, X-ray therapy)
- ▶ Field-class electrometer acc. IEC 60731 for air kerma measurements e.g. in X-ray/orthovoltage therapy (e.g. in combination with a Farmer chamber 0.6 cm³ or with the Soft X-ray chamber 0.2 cm³)
- ▶ Allows to connect either a semi-conductor detector, CT ionization chamber or a shadow-free ionization chamber for no interferences with the AEC
- ▶ Combined with the NOMEX[®] Multimeter and NOMEX[®] mAs, a single exposure simultaneously captures dose, dose rate, dose per pulse, pulses, frequency, irradiation time, tube voltage, total filtration, half value layer and waveforms for both kV and dose rate and mAs
- ▶ Provides for automatic air density correction
- ▶ Stores the last measurements and allows data and waveform export to Track-it[®] or as XLS, XML or CSV file via USB or Bluetooth[®]
- ▶ Software menu available in different languages: Chinese, English, French, German, Italian, Japanese, Portuguese, Russian, Spanish
