## TO WHOM IT MAY CONCERN

Freiburg, 20th December 2021

Dear Customers,

A few days ago a critical security gap (zero day exploit) in the Java library "Log4j" became known. This vulnerability (named as CVE-2021-44228 or "Log4Shell") is rated as extremely critical by the German Federal Office for Information Security (BSI). This resource with widespread impact it is widely reported in the media.

Neither our hardware nor software solutions use Java resources and therefore do not use the program library identified as a weak point. Thus PTW products are **not affected** by this security gap.

If you have any questions, please do not hesitate to contact us at [support@ptwdosimetry.com](mailto:support@ptwdosimetry.com).

Kind regards

PTW Freiburg GmbH
